

EXIT HARDWARE

• Fire Door •
safety first!

Getting the right fire safety product for the right place *will save lives!*

Selecting the right exit hardware for a facility can be a challenge. We will help you to understand the difference to make sure you get it right.

PANIC ESCAPE DOORS IN PUBLIC AREAS

Applies where the exit door is used by members of the public and provides safe and effective escape through the doorway with minimum effort and without prior knowledge of its operation.

Typical applications include:

- ✓ Schools
- ✓ Shops & Restaurants
- ✓ Hospitals
- ✓ Theatres & Cinemas

EMERGENCY ESCAPE DOORS IN NON-PUBLIC AREAS

Applies where the exit door is used by trained personnel who are familiar with the emergency exit and its hardware and therefore a panic situation is unlikely to occur.

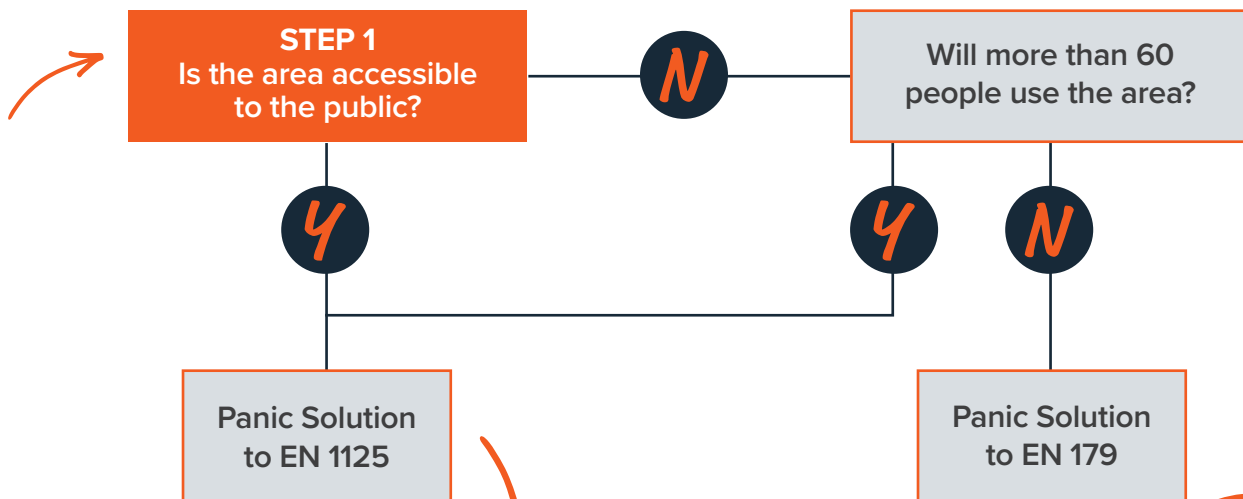

Typical applications include:

- ✓ Offices
- ✓ Private Apartments
- ✓ Factories
- ✓ Boiler Rooms & Stores

• Fire Door • *safety first!*

TYPES OF EXIT HARDWARE

To assist in the selection process use the following criteria as a guide.

Products used in panic applications require a device that covers at least 60% of the width of the door such as cross bars or touch bars.

Push bar operation for single or double doors.
Options include:

- ✓ Briton 376 ✓ Briton 378
- ✓ Briton 377 ✓ Briton 379.N

Products used in emergency applications require only a single point of operation such as push pads or levers.

Push pad operation for single or double doors.
Options include:

- ✓ Briton 372 ✓ Briton 389.N
- ✓ Briton 1438

If in doubt, always choose a product **to EN 1125 safety standards**
